Plant and Soil **166**: 301–304, 1994.

Contents Volume 166 (1994)

Research articles

Enhanced mineralization and denitrification as a result of heterogeneous distribution of clover residues in soil 1
T.A. Breland

Measured and predicted mineralization of clover green manure at low temperatures at different depths in two soils 13
T.A. Breland

Effects of growth period, plant age and changes in solution aluminium concentrations on aluminium toxicity in wheat 21
D.M. Wheeler

Root-shoot signaling in sunflower plants with confined root systems 31
M. Ternesi, A.P. Andrade, J. Jorrin and M. Benlloch

Protein patterns and superoxide dismutase activity in non-mycorrhizal and arbuscular mycorrhizal *Pisum sativum* L. plants 37
J. Arines, M. Quintela, A. Vilariño and J.M. Palma

Combined effect of salinity and hypoxia in wheat (*Triticum aestivum* L.) and wheat-*Thinopyrum* amphiploids 47
J. Akhtar, J. Gorham and R.H. Qureshi

A critical review of labelling techniques used to quantify rhizosphere carbon-flow 55
A.A. Meharg

Carbon distribution and nitrogen partitioning in a soil-plant system with barley (*Hordeum vulgare* L.), ryegrass (*Lolium perenne*) and rape (*Brassica napus* L.) grown in a $^{14}CO_2$-atmosphere 63
E. Zagal

Growth and osmotic adjustment of two tomato cultivars during and after saline stress 75
J.J. Alarcon, M.J. Sanchez-Blanco, M.C. Bolarin and A. Torrecillas

Effects of pH and heavy metal concentrations in solution culture on the proton release, growth and elemental composition of *Alyssum murale* and *Raphanus sativus* L. 83
M.P. Bernal and S.P. McGrath

Losses of ^{14}C from roots of pulse-labelled wheat and barley during washing from soil 93
J. Swinnen, J.A. van Veen and R. Merckx

Responses to water stress of apoplastic water fraction and bulk modulus of elasticity in sunflower (*Helianthus annuus* L.) genotypes of contrasting capacity for osmotic adjustment 101
C.A. Chimenti and A.J. Hall

Iron toxicity and other chemical soil constraints to rice in highland swamps of Burundi 109
J.G. Genon, N. de Hepcée, J.E. Duffy, B. Delvaux and P.A. Hennebert

Salt sensitivity and low discrimination between potassium and sodium in bean plants 117
M. Benlloch, M.A. Ojeda, J. Ramos and A. Rodriguez-Navarro

Computerized equipment to control soil water matric potential and soil temperature in inoculum potential assays of soil-borne pathogens 125
P.J. Oyarzun, T. van der Zalm, H.W. Roelofsen and G. Dijst

Effects of a catch crop on leaching of nitrogen from a sandy soil: Simulations and measurements 137
E. Lewan

Research articles

Measurement of biological dinitrogen fixation in grassland: Comparison of the enriched ^{15}N dilution and the natural ^{15}N abundance methods at different nitrogen application rates and defoliation frequencies 153
H. Høgh-Jensen, J.K. Schjoerring

Redox conditions and iron chemistry in highland swamps of Burundi 165
J.G. Genon, N. de Hepcée, B. Delvaux, J.E. Dufey, P.A. Hennebert

Senescence and protein remobilisation in leaves of maturing wheat plants grown on waterlogged soil 173
P.A. Stieger, U. Feller

Transfer of nitrogen from damaged roots of white clover (*Trifolium repens* L.) to closely associated roots of intact perennial ryegrass (*Lolium perenne* L.) 181
D.J. Hatch, P.J. Murray

How to monitor released rhizobia 187
S. Selenska-Pobell

Site factors, foliar nutrient levels and growth of *Cordia alliodora* plantations in the humid lowlands of Northern Costa Rica 193
C. Bergmann, M. Stuhrmann, W. Zech

Transpiration measurements on apple trees with an improved stem heat balance method 203
F.P. Weibel, J.A. de Vos

Influence of NO_3^- and NH_4^+ nutrition on fermentation, nitrate reductase activity and adenylate energy charge of roots of *Carex pseudocyperus* L. and *Carex sylvatica* Huds. exposed to anaerobic nutrient solutions 221
E. Müller, B.P. Albers, P. Janiesch

Denitrification and the evolution of nitrous oxide after the application of cattle slurry to a peat soil 231
S.C. Jarvis, D.J. Hatch, B.F. Pain, J.V. Klarenbeek

Concentration-dependent influence of quercetin on nodulation process and the main characteristics of soybean inoculated with *Bradyrhizobium japonicum* 243
N. Mihailović, M. Bogdanović, G. Dražić, R. Filipović, D. Radin

Role of root derived organic acids in the mobilization of nutrients from the rhizosphere 247
D.L. Jones, P.R. Darrah

Root turnover of groundnut (*Arachis hypogaea* L.) in soil tubes 259
U. Krauss, J.W. Deacon

The effect of soil phosphorus on the external mycelium growth of arbuscular mycorrhizal fungi during the early stages of mycorrhiza formation 271
J.C.C. de Miranda, P.J. Harris

Assimilation of exogenous 2′-^{14}C-indole- 3-acetic acid and 3′-^{14}C-tryptophan exposed to the roots of three wheat varieties 281
D.A. Martens, W.T. Frankenberger Jr.

Short communications

A rapid method for the visualisation of soil macropores 291
N.M. Holden

The effect of soil microflora on the survival of cuttings of *Epacris impressa* 295
C. McLean, A.C. Lawrie, K.L. Blazé
